

# SR 520 Bridge Replacement and HOV Program

## I-5 to Medina: Bridge Replacement and HOV Project

### **Overnight work near Madison Park begins mid-August**

Beginning Thursday, Aug. 15, WSDOT and its contractor, Mowat-American Joint Venture, will work extended shifts for the West Connection Bridge project. Crews will work up to several nights per week through October 2013. During these overnight shifts, crews will transport and place concrete. Concrete will be delivered by trucks using the westbound lanes of the existing SR 520.

Madison Park and Laurelhurst residents near Lake Washington may see trucks and barges at the work zone. Residents may also hear sounds from motors, pumps and back-up alarms. To limit what residents see and hear, WSDOT and its contractor will use construction best practices, such as limiting truck idling, using noise-blocking panels, and directing lights away from area residences when possible.

Additional night work for this project is expected through summer 2014. Residents will receive further noise notifications for these future activities.

### ***Early morning work on August 10***

Beginning at 6 a.m. on Saturday, Aug. 10, crews will install drilling equipment for the West Connection Bridge project. Residents may hear sounds from motors and other construction equipment. WSDOT and its contractor will use construction best practices to minimize noise impacts.
